

OPEN FEEDLOT

Registration Form

INSTRUCTIONS:

This is a voluntary registration and amnesty program which has been developed to help open feedlots comply with state and federal environmental requirements. Open feedlots which are required to have a permit from the Iowa Department of Natural Resources (DNR) should submit a registration form postmarked no later than December 31, 2001. The US Environmental Protection Agency (EPA) will not inspect an open feedlot that has registered with the Iowa DNR. EPA inspections are scheduled to resume April 1, 2001. If the feedlot registers by December 31, 2001, Iowa DNR will not enforce monetary penalties for most discharges or for the failure to have a permit. Following registration, DNR will visit a feedlot to determine a compliance schedule if the feedlot is required to have a permit.

You may complete and submit this form to the DNR if the number of animals in your open feedlot exceeds (a) 1,000 Animal Units (AU) or (b) 300 AU if your feedlot discharges directly to a water of the state either through a man-made drainage system or if a water of the state runs through your feedlot.

Sign your name in the space provided and send the form and the accompanying information to the DNR at the address listed at the back of this form. Your contact person in the DNR is Reza Khosravi. Please call at **515/242-6128** or send your e-mail to reza.khosravi@dnr.state.ia.us if you have any questions. For further information, please visit our website at: <http://www.state.ia.us/epd>.

1. Name of operation: _____ Owner _____

Owner's address: _____

_____ Telephone: _____

2. Person to contact regarding this registration form.(all correspondence will be sent to this person):

Name: _____ Title: _____ Telephone: _____

Address: _____

3. Location of operation: _____
(County) (Township) (Section) (Quarter)

4. Operation's address: _____

5. Estimated total area of open feedlot(Acres): _____

6. Type and capacity of any manure control and handling systems: _____

7. Include with this application a Farm Services Agency (FSA) section aerial photo. Mark the open feedlot boundaries, and draw the location of any solids settling facilities and any feedlot runoff control system that you are using in connection with your open feedlot operation. You may include other information such as feedlot and manure control handling design plans or written correspondence about your operation.

8. Capacity of operation:

Animal Species

**Maximum Number of
Animals In the Open
Feedlot At Any One
Time**

Beef Cattle

Dairy Cattle

Swine (over 55 lbs.)

Swine (under 55 lbs.)

Sheep and lambs

Horses

Turkeys

Broiler or layer chicken

I hereby certify that the information contained in this registration form is complete and accurate to the best of my knowledge.

Signature of Registrant(s): _____ Date: _____

_____ Date: _____

Title: _____

It is recommended that you keep a copy of this form with your records.

Mail completed form to:
